

BOOK OF ABSTRACTS

ICNI - III

**3rd INTERNATIONAL CONFERENCE
ON NONCOVALENT INTERACTIONS**

June 17th - 21st 2024
Belgrade, Serbia

University of Belgrade - Faculty of Chemistry

 **Chemistry
Europe**
European Chemical
Societies Publishing

Chemistry—A European Journal
ChemCatChem
ChemPhysChem
ChemPlusChem
EurJIC
EurJOC

Similarly to the previous editions, the 3rd International Conference on Noncovalent Interactions (ICNI-III) will continue the same tradition offering a multidisciplinair scientific program with the latest developments in the field from applications in synthesis, catalysis and mechanistic studies to material sciences and biological systems.

This Virtual Collection to be published by ChemistryEurope journals (*Chemistry – A European Journal*, *ChemCatChem*, *EurJIC*, *EurJOC*, *ChemPlusChem* and *ChemPhysChem*) highlights the latest developments in research on weak interactions and their applications. The invited papers by Invited, Keynote and Plenary Lecturers as well as IAB members and participants of ICNI-III to be featured here.

17-21 June, 2024 • Belgrade, Serbia

Republic of Serbia

MINISTRY OF SCIENCE,
TECHNOLOGICAL DEVELOPMENT AND INNOVATION

Local Organizing Committee

- Prof. Snežana D. Zarić
- Prof. Dušan Sladić
- Prof. Dragana Milić
- Dr. Dušan Malenov
- Dr. Dragan Ninković
- Dr. Jelena Živković
- Dr. Jelena Blagojević Filipović
- Dr. Dubravka Vojislavljević Vasilev
- Dr. Milan Milovanović
- Sonja Zrilić
- Katarina Ćeranić

International Advisory Board

- Prof. Elangannan Arunan - Indian Institute of Science, India
- Prof. Dario Braga - University of Bologna, Italy
- Prof. Pierre Braunstein - University of Strasbourg, France
- Prof. Antonio Caballero -Universidad de Murcia, Spain
- Prof. Jean-François Carpentier - CNRS-Université de Rennes 1, France
- Prof. Scott L. Cockcroft - University of Edinburgh, UK
- Prof. Debbie C. Crans - Colorado State University, USA
- Prof. Jean-Pierre Djukic - University of Strasbourg, France
- Prof. M. Teresa Duarte - University of Lisbon, Portugal
- Prof. Catharine Esterhuysen - Stellenbosch University, South Africa
- Prof. Antonio Frontera - Universitat de les Illes Balears, Spain
- Prof. Philip A. Gale - University of Technology Sydney, Australia
- Prof. Michael K. Gilson - University of California San Diego, USA
- Prof. Fabrizia Grepioni - University of Bologna, Italy
- Prof. M. Fátima C. Guedes da Silva - University of Lisbon, Portugal
- Prof. Akira Harada - Osaka University, Japan
- Prof. Matti Haukka - University of Jyväskylä, Finland
- Prof. Pavel Hobza - Academy of Sciences of the Czech Republic, Czech Republic
- Prof. Feihe Huang - Zhejiang University, China
- Prof. Wei Jun Jin - Beijing Normal University, China
- Prof. Susumu Kitagawa - Kyoto University, Japan,
- Dr. Maximilian N. Kopylovich - University of Lisbon, Portugal
- Prof. Vadim Yu. Kukushkin - Saint Petersburg State University, Russian Federation
- Prof. Yu Liu - Nankai University, China
- Prof. Abel M. Maharramov - Baku State University, Azerbaijan
- Dr. Kamran T. Mahmudov - University of Lisbon, Portugal, International Secretary of the ICNI
- Prof. Stefan Matile - University of Geneva, Switzerland
- Prof. Pierangelo Metrangolo - Politecnico di Milano, Italy
- Prof. Marta E. G. Mosquera - Universidad de Alcalá, Spain
- Prof. Djamaladdin G. Musaev - Emory University, USA
- Dr. Dana Nachtigallova - Academy of Sciences of the Czech Republic, Czech Republic
- Prof. G. Narahari Sastry - CSIR-Indian Institute of Chemical Technology, India
- Prof. Werner M. Nau - Jacobs University Bremen, Germany
- Prof. Armando J. L. Pombeiro - University of Lisbon, Portugal
- Prof. Giuseppe Resnati - Politecnico di Milano, Italy
- Prof. Steve Scheiner - Utah State University, USA
- Prof. Hans-Jörg Schneider - Organische Chemie der Universität des Saarlandes, Germany
- Prof. Elena S. Shubina - Russian Academy of Sciences, Russian Federation
- Prof. Anthony Stone - University of Cambridge, UK
- Prof. F. Dean Toste - University of California, USA
- Prof. Leyong Wang - Nanjing University, China
- Prof. Andrew S. Weller - University of York, UK
- Prof. Steven E. Wheeler - University of Georgia, USA
- Prof. Snežana D. Zarić - University of Belgrade, Serbia

How selenium's electronic structure favor its participation in non-covalent interactions?

Keywords: selenium, chalcogen bond, halogen bond, hydrogen bond

Selenium is an exceptional chalcogen with distinct features that make it a valuable element in the study of non-covalent interactions. Firstly, selenium's ability to exist in different oxidation states allows for the formation of varying covalent bonds with neighboring atoms. Secondly, due to the anisotropic electronic shell, selenium atom enables its participation in non-covalent interactions as both a nucleophile and an electrophile. Thirdly, selenium's electron shell has a notable tendency to polarize, making it possible to adjust the electrophilicity/nucleophilicity of selenium compounds through intramolecular electronic effects and influence of environment (i.e. solvent, neighboring groups). Lastly, the abundance of the isotope selenium-77 makes it particularly well-suited for measuring NMR spectra, facilitating direct experimental observation of non-covalent interactions involving selenium.

In this presentation, we will cover various studies carried out by our research group focusing on non-covalent interactions with the selenium atom. We will delve into fundamental aspects, such as the distinctive electronic structure of selenium^[1] and the impact of external conditions.^[2,3] Additionally, we will discuss the reasons behind the effectiveness of selenium-containing proteins in human body's antioxidant defense.^[4] Furthermore, we will present an example highlighting the dual nature of selenium as an electrophile and nucleophile in the context of recently studied complexes.
