### Invitation for research stay

Dear Ms. Glavinskaya:

This letter is to invite you to the Friedrich-Alexander University of Erlangen-Nürnberg (FAU) in Erlangen, Germany, for a research stay funded by the German-Russian Interdisciplinary Research Center from November 29 to December 24. During this time, you will perform coatings of the powders synthesized in your laboratory at Saint Petersburg State University, then you will characterize your samples by all analytical methods available at the Chair 'Chemistry of Thin Film Materials', which I lead at FAU. I will provide you with an office desk and computer and the access to all instruments needed for his project. I will also ensure adequate scientific supervision and technical support throughout your stay.

I look forward to seeing your exciting results, and I remain at the disposal of the German Consulate should there be any further questions.

Yours,
